

TCS vs Infosys: Fundamentals Compare

Prepared 28 Sep 2026 | Consolidated figures | Primary source: Screener.in (cross-checked where noted) | Educational only

Price snapshot

TCS - Rs. 2,071 (28 Sep close)

52W: Rs. 1,976 - Rs. 3,350

Market cap Rs. 7.48 lakh Cr | Face value Rs. 1

Screener; market cap cross-checked with Tickertape (Rs. 7.55 lakh Cr, 25 Sep)

Infosys - Rs. 1,007 (28 Sep, intraday)

52W: Rs. 982 - Rs. 1,728

Market cap Rs. 4.09 lakh Cr | Face value Rs. 5

Screener; cross-checked with Value Research (Rs. 4.07 lakh Cr)

A daily price-history series could not be retrieved live, so the price charts use the return and 52-week figures Screener publishes instead.

Side-by-side comparison

Metric	TCS	Infosys
P/E (TTM)	13.9	13.1
P/B	~7.0 (2,071 / 296)	~4.5 (1,007 / 225)
EV/EBITDA	[!] Data unavailable - verify on Screener/Tickertape	9.3 (StockAnalysis, Jul 2026)
Revenue CAGR 3Y / 5Y	6% / 10%	7% / 12%
Profit CAGR 3Y / 5Y	8% / 9%	8% / 9%
EBITDA margin (TTM)	26.9%	23.7%
Net margin (TTM)	18.1%	16.4%
ROE (last yr / 3Y avg)	52% / 52%	32% / 31%
ROCE	63%	40%
Debt / Equity	0.11	0.10
Interest coverage (EBIT/interest)	~53x	~90x
Current ratio	[!] Data unavailable	1.86 (StockAnalysis)
Free cash flow FY26	Rs. 48,013 Cr	Rs. 31,259 Cr
Dividend yield / payout (FY26)	3.09% / 81%	4.84% / 66%
Promoter holding	71.77%	13.82%
Promoter pledging	[!] Data unavailable - verify on NSE/BSE	0% (MoneyWorks4Me, older figure)
Next results	8 Oct 2026	23 Oct 2026

Ratios computed from Screener statements: D/E = borrowings / (equity + reserves), Mar 2026. Tickertape shows a different TCS P/E (15.34) and yield (5.27%), likely due to differing earnings or dividend definitions.

Valuation read

Both trade at low-teens P/E, well below the ~25.9x peer median Value Research quotes for Infosys (single source; peer set not verified). Five-year price CAGRs are negative while profits kept growing, so most of the change has come from the multiple falling. By the skill's rule (cheap = below both sector and own history), the sector comparison points to **cheap**; own 5-year P/E history was not retrievable, so the verdict is **partial**. TCS's higher P/B mostly reflects its much higher ROE.

Growth and earnings

TCS Dec 2025 EPS dipped as other income was negative (-Rs. 2,273 Cr); the cause was not verified. Growth is **steady but modest** for both: trailing-twelve-month sales grew 8% (TCS) and 11% (Infosys). Infosys is growing revenue slightly faster; TCS earns higher margins and returns on capital.

Ownership trends

Sep 2023 to Jun 2026: TCS FIIs 12.47% to 9.07%, DIIs 10.01% to 13.41%. Infosys FIIs 33.60% to 27.09%, DIIs 35.19% to 42.78%. Foreign investors have been net reducers in both while domestic institutions absorbed the supply. TCS promoter (Tata group) holding has been flat at 71.77% since Mar 2024. Infosys promoters fell from 14.38% to 13.82% in Jun 2026; Infosys is founder-led, so a low promoter stake is structural, though the recent dip is worth noting. Source: Screener shareholding tables.

Risk factors

TCS

- Slowing growth: 3Y sales CAGR only 6%.
- Falling foreign ownership (-3.4 pts in ~3 years).
- Very high payout (81-100% in some years) leaves less room for reinvestment.
- Debtor days rose from 81 to 93 (FY24 to FY26): slower collection from clients.
- Large swings in other income affect reported profit.
- Pledging and current ratio need independent verification.

Sector-wide: both derive most revenue from global clients (TCS: BFSI alone ~32% of revenue in Q3 FY26 per Screener), so client spending cuts, currency moves and AI-driven pricing pressure affect the whole group. Screener flags TCS's 5Y sales growth as 'poor'.

Where each leads

Where TCS leads

- ROE, ROCE and margins
- Absolute free cash flow
- Stable promoter holding

Infosys

- Lower margins (EBITDA ~24%) than TCS, little changed over 5 years.
- FII holding down ~6.5 pts; price near its 52-week low.
- Promoter stake fell 0.56 pts last quarter.
- Free cash flow slipped from Rs. 33,457 Cr to Rs. 31,259 Cr in FY26.
- EV/EBITDA figure is from July 2026 and may be stale.

Where Infosys leads

- Revenue growth (5Y and TTM)
- Lower P/B and higher dividend yield
- Interest coverage

Neutral summary: two high-quality, near-debt-free IT services companies whose stocks have both de-rated sharply while profits grew slowly. They differ mainly in profitability (TCS higher) and growth pace (Infosys slightly higher). No winner is implied.

Data confidence: Moderate. Core financials and shareholding come from Screener; several ratios (EV/EBITDA, current ratio, pledging, peer medians) came from single or older sources or were unavailable. The skill's Deep Dive template was not present, so this report uses Compare format.
